

AHAMMED ZIDAN M

Cybersecurity Graduate — CPT Certified — SOC Pentesting
+91-9072272459 — davinzidan99@gmail.com — linkedin.com/in/davinzidan

Career Objective

Motivated Computer Science graduate and Certified Penetration Tester (CPT v4) seeking entry-level roles in Cybersecurity, including SOC Analysis and Penetration Testing, with a strong foundation in networking, system security, and threat detection. Possess hands-on knowledge in vulnerability assessment, reconnaissance, and basic exploitation techniques, with exposure to real-world attack scenarios and industry tools. Currently preparing for CEH certification while developing skills in incident response, log analysis, and security operations. Demonstrates an understanding of cyber threats such as malware and phishing, with the ability to identify vulnerabilities and support security monitoring. Committed to continuous learning and contributing to organizational security through proactive defense and analytical problem-solving.

Education

- **B.E. Computer Science Engineering**, Yenepoya Institute of Technology 2021–2025
CGPA: 8 — First Class with Distinction
- **Higher Secondary (DHSE)** 2020 — 83%
- **Secondary School (CBSE)** 2018 — 83%

Training

- **Cybersecurity Training (CEH Preparation – Ongoing)** 2026
Hands-on training in penetration testing, networking, and security concepts including reconnaissance, vulnerability assessment, web security testing, and usage of tools like Nmap, Burp Suite, and Wireshark.

Projects

- **FixNGo Application** 2025
Developed a Flutter-based mobile application focused on real-time vehicle issue support and service coordination. Implemented intuitive UI/UX, issue tracking, and service request handling. Integrated backend logic and optimized performance for efficient user interaction.
Tools: Flutter, Firebase, REST APIs
- **E-commerce Web Application** 2024
Built a full-stack web application with secure authentication, product management, and dynamic user interface. Developed backend APIs for efficient data handling and ensured smooth front-end integration with responsive design.
Tools: React, Django, MySQL, HTML, CSS, JavaScript
- **Session Hijacking Tool (ESP)** 2026
Developed a proof-of-concept security testing tool to demonstrate session hijacking attacks using ESP hardware and Python scripts. Performed packet analysis and simulated attack scenarios to understand vulnerabilities in unsecured networks.
Tools: Python, ESP8266, Wireshark, Kali Linux

Internships

- **Grant Thornton Bharat — Cybersecurity Intern** June 2025
Performed IT risk assessment and assisted in identifying security vulnerabilities across systems. Supported cybersecurity governance and compliance processes through documentation and analysis. Contributed to preparation of security reports and risk mitigation recommendations. Gained exposure to real-world enterprise security practices and frameworks.
- **Inventron Technologies — Full Stack Intern** Oct–Nov 2023
Developed and maintained web applications, handling frontend, backend, and database integration. Improved system performance, usability, and debugging processes.

Technical Skills

Cybersecurity: Vulnerability Assessment, Penetration Testing Fundamentals, Network Security, Web Application Security, Reconnaissance & Enumeration, Basic Exploitation Techniques, Threat Analysis

Tools: Nmap, Burp Suite, Wireshark, Metasploit (Basic), Nikto

Networking: TCP/IP, DNS, DHCP, Subnetting, Network Protocol Analysis

Programming: Python, Java, HTML, CSS, JavaScript

Other: Technical Documentation, Security Reporting, Basic Incident Analysis

Soft Skills: Communication, Problem Solving, Teamwork

Certifications

- Certified Penetration Tester (CPT v4) – RedTeam Hacker Academy
- Certified Ethical Hacker (CEH) – In Progress
