

AHAMMED ZIDAN M

Cybersecurity Graduate | CPT v4 Certified | VAPT & Web Application Security | CEH Candidate

+91 9072272459 | davinzidan99@gmail.com | linkedin.com/in/davinzidan9961 | davinzidan.github.io/cybersecurity-portfolio/

PROFILE SUMMARY

CPT v4 certified cybersecurity graduate focused on VAPT, web application security, and practical penetration testing. Hands-on with Burp Suite, Nmap, Nikto, Wireshark, Kali Linux, OWASP Juice Shop, and PortSwigger Web Security Academy. Experienced in validating vulnerabilities, collecting evidence, and writing clear security reports with impact and remediation.

CORE SKILLS

Web/VAPT: OWASP Top 10, vulnerability assessment, reconnaissance, manual verification, security reporting, basic exploitation

Tools: Burp Suite, Nmap, Nikto, Wireshark, Metasploit Basic, Kali Linux, Docker

Networking: TCP/IP, DNS, DHCP, subnetting, network troubleshooting, LAN/WAN support

Programming: Python, Java, HTML, CSS, JavaScript

SELECTED SECURITY PROJECTS

PortSwigger File Upload RCE Lab - Burp Suite Web Security Testing

- Exploited an authorized PortSwigger lab demonstrating remote code execution through unrestricted PHP avatar upload.
- Captured and reviewed the multipart upload transaction in Burp Proxy HTTP history, then verified server-side PHP execution from a web-accessible upload path.
- Documented evidence, exploit path, business impact, and remediation for secure file upload handling.
- GitHub: github.com/davinzidan/Ahmed-Zidan-M/tree/main/portswigger-file-upload-rce

OWASP Juice Shop VAPT Report - Web Application Vulnerability Assessment

- Deployed OWASP Juice Shop locally with Docker and performed reconnaissance, automated scanning, and manual validation.
- Documented SQL injection authentication bypass, exposed directory listing, confidential file exposure, verbose error disclosure, missing security headers, and CORS misconfiguration.
- Produced a professional VAPT report with screenshots, severity, impact, and remediation steps.
- GitHub: github.com/davinzidan/Ahmed-Zidan-M/tree/main/owasp-juice-shop-vapt-report

Session Hijacking Tool - Proof of Concept

- Built a proof-of-concept tool using ESP8266 and Python to understand session hijacking risks in unsecured networks.
- Used Wireshark for packet analysis and traffic inspection in a controlled learning environment.

EXPERIENCE

Blue Marine Plywood & Hardware - Network & IT Support Executive | Apr 2025 - Jun 2026

- Provided day-to-day IT support across multiple branches, including hardware, software, printer, and network troubleshooting.
- Supported LAN administration, system setup, device configuration, Windows maintenance, user support, and IT asset documentation.
- Worked with Task Software for accounting operations support, troubleshooting, and maintenance.

Grant Thornton Bharat - Cybersecurity Intern | Jun 2025

- Assisted with IT risk assessment, cybersecurity governance, documentation, and vulnerability/risk analysis activities.
- Supported preparation of security reports and mitigation recommendations in an enterprise environment.

EDUCATION

B.E. Computer Science Engineering - Yenepoya Institute of Technology | 2021 - 2025 | CGPA: 8.0

Higher Secondary DHSE | 2020 | 83% Secondary School CBSE | 2018 | 83%

TRAINING & CERTIFICATIONS

- Certified Penetration Tester CPT v4 - RedTeam Hacker Academy
- Certified Ethical Hacker CEH v13 - In Progress
- Cybersecurity training covering reconnaissance, vulnerability assessment, web security testing, Nmap, Burp Suite, Wireshark, and reporting.
